

SILVER STREAK

The standard of quality for a quarter of a century

In 1974 a silver anniversary was quietly observed by the builders of one of the finest selections of recreational vehicles in the country.

Twenty-five years of continuous production at Silver Streak Trailer Company, Inc., under the original management, is sound evidence that the discriminating recreational vehicle public seeks out true quality.

From the days of the original 22-ft. Clipper to the present lavish 32-ft. Continental Supreme, Silver Streak has undergone four basic modifications in configuration. Each change was initiated with the express purpose of providing improved road handling and allowing more generous living areas.

Through the years, Silver Streak management has maintained the policy of building only all-aluminum aircraft type constructed recreational vehicles, assuring absolute stability and durability.

Each year factory representatives tow Silver Streak travel trailers more than 100,000 miles and are ever alert for improvements in every element of performance — from towing to the operation of appliances. In this way the discerning owner may be assured that factory personnel anticipate any improvements that will add to traveling pleasure.

SUPREME AVAILABLE IN 2800, 3000 AND 3200 SERIES ONLY.

SUPREME AVAILABLE IN 2800, 3000 AND 3200 SERIES ONLY.

ALL MODELS AVAILABLE IN TWIN OR DOUBLE BED W/SECTIONALS OR CONVERT-A-BED IN LIVING ROOM.

Luxurious interiors have marked the winning style with Silver Streak. Decor is uppermost in the minds of those who make the decisions in the company. They are ever mindful that despite superior construction features, livability is of paramount importance once the owner steps inside the door. Consequently floor plans that maximize living areas are distinguishing features with Silver Streak.

An additional bonus provided Silver Streak owners is the club program. This activity is considered a valuable benefit among participating owners. Each year a national rally is sponsored by the factory. All owners, club members or not, are invited to these gatherings from all over the country. By the hundreds they meet to renew old friendships and make new ones.

A factory tour is always offered any visitor who drops by the offices in South El Monte, Calif. Here he will see for himself the care that goes into the building of one of the finest travel trailers anywhere — and why Silver Streak has led the way for more than 25 years.

Underbelly is completely sealed for frame protection and prevents dust and the elements from penetrating the interior.

Silver Streak is the only manufacturer of an all-aluminum trailer to form its own roof bows, door jams, and floor channels. This is one demonstration of quality control.

Two complete shells form the body of your Silver Streak. They are separated by 2-in. high-density hand-packed fiberglass insulation in the roof and sidewalls. A plastic vapor barrier is

placed on all cross members and ribs to prevent "sweating."

Large sewage tank and separate waste water tank provides complete self-containment. 4-in. fiberglass insulation is in the floor, plus 4-in. air space. Double wheel well covers have 2-in. fiberglass insulation.

True aircraft construction is a part of Silver Streak. Outside skin is .032 anodized aluminum and inside is .032 vinyl laminated aluminum. Roof and sidewalls are riveted together as one unit.
