

15343 E. Proctor Industry

DOMETIC REFRIGERATOR

Operation by Bottled Gas or Electricity

Instructions for Use

330-0601

Gas Operation

1. To start the refrigerator, turn the gas valve lever A to open position and turn the thermostat knob B to setting 4.
2. Press the red button C of the automatic pilot and after about 15 seconds, turn the lighter rod D clockwise with a rapid movement. This will create a spark which lights the burner.
3. After the burner is lit, keep the button C pressed for an additional 15 seconds.
4. Release the button C and check that the burner is operating. If not, repeat the lighting procedure.

Electric Operation

1. To start the refrigerator, turn the gas valve lever A to the shut-off position.
2. Plug the electrical cord into the supply socket.
3. Turn the electric thermostat knob B to setting 4.
